

## Table of contents

Foreword	13
<b>Part 1. Tailoring nutrition to the physiology of the horse</b>	
Digestive strategy and flexibility in horses with reference to dietary carbohydrates <i>R.J. Geor</i>	17
Plasma pancreatic $\alpha$ -amylase profile does not reflect starch digestion in healthy horses <i>I. Vervuert and M. Coenen</i>	29
Revision of the energy and nutrient requirements of mares; I. Gestation <i>M. Coenen, S. Schmidt, A. Zeyner and E. Kienzle</i>	32
Revision of the energy and nutrient requirements of mares; II. Lactation <i>M. Coenen, S. Kirchhof, E. Kienzle and A. Zeyner</i>	35
Metabolizable energy for horses: development of a simple and flexible feed evaluation system <i>E. Kienzle and A. Zeyner</i>	37
Protein evaluation of horse feed: a novel concept <i>A. Zeyner, S. Kirchhof, A. Susenbeth, K.-H. Südekum and E. Kienzle</i>	40
Milk intake and foal growth-a review of literature <i>B. Schmidt, A. Zeyner, E. Kienzle, S. Kirchhof and M. Coenen</i>	43
Energy requirements of pregnant mares according to oxygen consumption data of foetus and annexes: a meta analysis <i>S. Schmidt and M. Coenen</i>	47
Digestibility of calcium and phosphorous in yearlings <i>A. Jansson and F. Löf</i>	50
<b>Part 2. Nutrition behaviour and welfare</b>	
Biological basis of behaviour in relation to nutrition and feed intake in horses <i>A.D. Ellis</i>	53
Electromyographic evaluation of masseter muscle activity in horses fed different types of roughage <i>I. Vervuert, N. Brüßow, M. Bochnia, T. Hollands, D. Cuddeford and M. Coenen</i>	75
Increasing foraging opportunities improves welfare and reproduction efficiency in Arab breeding mares <i>H. Benhajali, M.-A. Richard-Yris, M. Ezzaouia, F. Charfi and M. Hausberger</i>	78
Influence of physical structure of haylage on equine eating behaviour <i>C.E. Müller</i>	81
<b>The impact of nutrition on the health and welfare of horses</b>	<b>7</b>

The effects of soaked and un-soaked high fibre pelleted feeds on chewing time to swallow in the horse and feed volume changes <i>in vitro</i> : a pilot study <i>C. Lawrence, N. Blackie, A.D. Ellis and S. Tracey</i>	84
Preference of forage feeding position in stabled horses: a pilot study <i>V. Webster and A.D. Ellis</i>	87
Effects of diet on behaviour of Standardbred horses in training <i>A. Jansson</i>	88
Effect of diet on plasma tryptophan and serotonin in horses: a link to behaviour? <i>A.D. Ellis, G. Piccione, C. Giannetto, E.K. Visser and D. Alberghina</i>	89
 <b>Part 3. Promoting health and preventing disease</b>	
On the interaction between nutrition, health and disease <i>M. Coenen</i>	93
Ration formulation in horses: the scope of interpretation <i>I. Vervuert and D. Bergero</i>	106
Metabolic actions of intermittent exogenous equine parathyroid hormone (ePTH 1-37) in horses <i>K. Weisrock, W. Martin-Rosset, B. Remy, W.G. Forssmann, N. Parvizi, M. Coenen and I. Vervuert</i>	116
Assessment of bone mineral density by dual X-ray absorptiometry in the horse: a methodological approach <i>I. Vervuert, J. Junge, W. Martin-Rosset and M. Coenen</i>	120
Using faecal pH to predict gut health in horses <i>J.A. Næsset and D. Austbø</i>	123
The effect of steam treatment on the total viable count, mould and yeast numbers in hay using the Haygain hay steamer <i>R. James and M. Moore-Colyer</i>	128
Validation of long chain fatty acids as markers to estimate diet composition of equines fed on grassland-heathland vegetation components <i>L.M.M. Ferreira, A.S. Santos, R. Celaya, V. Falco, M.A.M. Rodrigues and K. Osoro</i>	133
Steaming hay for horses: the effect of three different treatments on the respirable particle numbers in hay treated in a Haygain steamer <i>C. Stockdale and M.J.S. Moore-Colyer</i>	136
The effect of a binding agent on occurrence of the mycotoxin Zearalenon (ZON) in equine faeces <i>H.J. Walton, A.D. Ellis, K. Meynen and P. Harris</i>	139
Feeding working donkeys in Mexico; success in simplicity <i>F. Burden and A. Trawford</i>	141

#### **Part 4. Nutrition and gastro-intestinal health**

Conditions affecting gastrointestinal tract health <i>A.E. Durham</i>	145
Equine microbial gastro-intestinal health <i>S. Sadet-Bourgeteau and V. Julliand</i>	161
Feeding protected sodium bicarbonate attenuates hindgut acidosis in horses fed a high grain ration <i>J.D. Pagan, T.J. Lawrence, L.A. Lawrence and C. Brown-Douglas</i>	183
Effect of collection time on the fermentative activity of equine faeces in the gas production technique <i>G. Desrousseaux, A.S. Santos, W.F. Pellikaan, J.W. Cone, L.M.M. Ferreira, C.M.V. Guedes and M.A.M. Rodrigues</i>	189
Investigation of the buffering action and fermentation activity of Aquacid, when incubated <i>in vitro</i> with fibre and concentrate diets <i>M.J.S. Moore-Colyer</i>	193
Effect of three different forage-based diets on microbial flora, pH and viscosity of the equine hindgut <i>S. Muhonen, F.C. Wartena, A. Wesker and V. Julliand</i>	196
<i>In vitro</i> equine caecal fermentation of different casein levels <i>A.S. Santos, L.M.F. Ferreira, M. Cotovio, F. Silva, C.M.V. Guedes, J.W. Cone, R.J.B. Bessa and M.A.M. Rodrigues</i>	199
Individual effects on adaptation of equine intestinal microflora to fructans: indirectly measured by hydrogen exhalation test <i>A. Mößeler, I. Vervuert and M. Coenen</i>	203
A comparative study of the apparent total tract digestibility of fibre in Icelandic and Danish Warmblood horses <i>R.B. Jensen, C. Brøkner, K.E. Bach Knudsen and A.H. Tauson</i>	207
The effect of sugar beet pulp on caecal pH in Norwegian cold-blooded trotter horses <i>C. Brøkner, D. Austbø, J.A. Næsset, K.E. Bach Knudsen and A.H. Tauson</i>	210

#### **Part 5. Nutrition and metabolic disease**

Recent advances in the understanding of laminitis and obesity <i>P.A. Harris and R. Geor</i>	215
Nutritional risk factors for the development of hyperlipaemia in a population of donkeys <i>F. Burden, E. Hazell-Smith and A. Trawford</i>	234
Validation of the deuterium oxide (D <sub>2</sub> O) dilution method for the measurement of body fat content in living ponies <i>A. Dugdale, G. Curtis, P.A. Harris, E. Milne and C.M.G. Argo</i>	235

Comparison of two, practical weight loss protocols for the management of overweight and obese horses and ponies 237  
*G.C. Curtis, C.F. Barfoot, A.H.A. Dugdale, P.A. Harris, D. Grove-White and C.M.G. Argo*

The effect of water temperature on loss of water-soluble carbohydrates from hay soaked in water for up to 16 hours 238  
*A.C. Longland, C. Barfoot and P.A. Harris*

## **Part 6. Functional nutritional ingredients**

Functional nutritional ingredients: science behind the claims for health 241  
*C.E. Dunnnett and I. Vervuert*

Evaluation of nutritional functional ingredients for improvement of digestive tract health and performance 254  
*A. Zeyner*

Lack of effect of linseed-based feed additive on gastric ulcers in horses 266  
*S. Hyypä, S. Särkijärvi, M.T. Saastamoinen and T. Eskonen*

Effect of linseed based feed supplementation on sand excretion in horses 269  
*S. Särkijärvi, S. Hyypä and S. Saastamoinen*

Organic versus inorganic zinc supplementation: effect on markers of zinc status 272  
*C.E. Dunnnett and M. Dunnnett*

Comparative effect of organic and inorganic selenium supplementation on markers of selenium status 276  
*M. Dunnnett and C.E. Dunnnett*

Influence of garlic supplementation on respiratory health and incidence of anaemia in horses 280  
*M.T. Saastamoinen, S. Hyypä and S. Särkijärvi*

A randomised placebo controlled double blind study on the effect of subspecies of rose hip (*Rosa canina*) on the immune system, working capacity and behaviour of horses 283  
*K. Winther, A. Kharazmi, A.S.V. Hansen and J. Falk-Rønne*

Effects of a live or heat-treated lactic-acid bacteria versus a placebo on faecal microbial communities and activities in horses 288  
*C. Faubladiet, E. Jacotot, C. Berger and V. Julliand*

Can oral intake of gamma-oryzanol (experimentally given orally as pure substance) result in doping relevant testosterone levels in the urine of mares and geldings? 293  
*A. Mößeler, S. Licht, L. Wilhelm and J. Kamphues*

## **Part 7. Nutrition, health and performance**

Preventing problems whilst maximizing performance 299  
*J.E. Lindberg and A. Jansson*

Effect of growth rate on plasma leptin and bone markers, and metacarpal ultrasound measurements in the young Lusitano horse <i>M.J. Fradinho, M. Barbosa, M.J.C. Vila-Viçosa, A. Rosa, F. Perestrello, R.J.B. Bessa, R.M. Caldeira and G. Ferreira-Dias</i>	308
Relationship between body weight variations and biological parameters during the work season in show horses <i>C. Amato, L. Martin, B. Siliart, P. Nguyen and H. Dumon</i>	314
Effect of a new alive lactic bacteria as a probiotic on organic matter and cell-walls digestibility in competing endurance horses <i>A.G. Goachet, C. Berger and V. Julliard</i>	319
Accelerometer based system for the monitoring of exercise in horses <i>K. Kubus, R.P. Wilson, I. Vervuert and M. Coenen</i>	323
Keyword index	325
Author index	327
