

Table of contents

Preface	13
Chapter 1. Welfare concepts	15
<i>D.M. Broom</i>	
Abstract	15
1. Welfare definition	15
2. Welfare and needs	19
3. Welfare and feelings	21
4. Welfare and stress	22
5. Welfare and health	23
6. Welfare and pain	25
7. Welfare concepts in relation to assessment	27
References	29
Chapter 2. Assessment of pig welfare	33
<i>P. Mormède</i>	
Abstract	33
1. Introduction	33
2. Neuroendocrine systems	35
3. Behaviour	48
4. Production and pathology	51
5. Conclusion and perspectives	53
References	55
Chapter 3. The welfare of pregnant and lactating sows	65
<i>R. Bergeron, M.-C. Meunier-Salaün and S. Robert</i>	
Abstract	65
1. Introduction	65
2. Hunger and thirst	66
3. Discomfort	69
4. Pain and injuries	71
5. Behavioural needs	75
6. Fear, stress and suffering	80
References	83

Chapter 4. The welfare of piglets	97
<i>B. Puppe, M.-C. Meunier-Salaün, W. Otten and P. Orgeur</i>	
Abstract	97
1. Introduction	98
2. Comfort and housing requirements	98
3. Nutrition and welfare	104
4. Viability and health	108
5. Behavioural needs	112
6. Fear, stress and suffering	115
7. Conclusions	121
References	122
Chapter 5. The welfare of growing-finishing pigs	133
<i>J.G. Gentry, A.K. Johnson and J.J. McGlone</i>	
Abstract	133
1. Introduction	134
2. Welfare of the recently weaned and nursery pig	134
3. Main Grow-Finish period	141
4. Housing and environmental effects on welfare and meat quality of the G-F pig	145
5. Research opportunities to improve Grow-Finisher pig welfare	151
6. Conclusions	152
References	152
Chapter 6. The welfare of pigs during transport	161
<i>C. Bench, A. Schaefer and L. Faucitano</i>	
Abstract	161
1. Introduction	161
2. Loading density	162
3. Transport distance and duration	169
4. Vehicle design	176
5. Non-ambulatory animals or those otherwise unfit for transport	180
6. Conclusions	186
References	187

Chapter 7. Effects of preslaughter handling on stress response and meat quality in pigs	197
<i>L. Faucitano and N.A. Geverink</i>	
Abstract	197
1. Introduction	197
2. Critical points within the pre-slaughter period	199
3. Conclusions	215
References	215
 Chapter 8. Welfare of pigs during stunning and slaughter	 225
<i>M. Raj</i>	
Abstract	225
1. Introduction	226
2. Handling during stunning	227
3. Stunning methods	227
4. Killing of pigs on the farms during disease outbreaks	240
References	240
 Chapter 9. Breeding pigs for improved welfare	 243
<i>L. Rydhmer and N. Lundeheim</i>	
Abstract	243
1. Introduction	243
2. Genetics and animal breeding	244
3. Pig breeding today	247
4. Direct influence of breeding procedures on welfare	248
5. Heterosis improves piglet vitality	248
6. Selection for increased litter size requires selection for piglet survival	250
7. Maternal behaviour and fear	251
8. The sow's ability to produce milk and to use body reserves	252
9. Relations between growth, leanness, feed conversion and welfare	253
10. Leg weakness and longevity	254
11. Selection against or for extreme stress sensitivity?	255
12. Selection for improved resistance to micro-organisms	256
13. Breeding instead of castration?	258
14. Selection against 'bad behaviour'	259
15. Selection for decreased environmental sensitivity	261
16. More data are needed to improve welfare by breeding	262
17. The role of cooperation in improving pig welfare	262
18. Practical implications	263
References	264

Chapter 10. Human-pig relationships	271
<i>P.H. Hemsworth</i>	
Abstract	271
1. Human-animal relationships in pig production	271
2. Fear, productivity and welfare	273
3. Stockperson characteristics regulating the pig's fear of humans	276
4. Other important job-related characteristics of the stockperson	277
5. Opportunities to improve human-animal interactions in the pig industry	281
6. Training	281
7. Selection of stockpeople	283
8. Conclusion	284
References	285
Chapter 11. The welfare of pigs: a social, ethical and scientific issue	289
<i>D. Fraser</i>	
Abstract	289
1. Introduction	290
2. Debate about animal welfare	291
3. Animal welfare science	293
4. Animal welfare assurance programs	296
5. The application of animal welfare science	299
References	300
Index	305
