Editor
John Lewis, Royal Holloway, University of London, UK

Journal of Helminthology publishes original papers and
review articles on all aspects of pure and applied
helminthology, particularly those helminth parasites of
environmental health, medical or veterinary importance.
Research papers on helminths in wildlife hosts, including
plant and insect parasites, are also published along with
taxonomic papers contributing to the systematics of a
group. The journal will be of interest to academics and
researchers involved in the fields of human and veterinary
parasitology, public health, microbiology, ecology and
biochemistry.

animal

Published for The Animal Consortium
(www.animal-journal.eu)

animal
is available online at:
http://journals.cambridge.org/anm

Editor-in-Chief
Michel Doreau, INRA, France

animal publishes original cutting-edge research, 'hot' topics and horizon-scanning reviews on animal-related aspects of the life sciences at the molecular, cellular, organ, whole animal and production system levels. The main subject areas include: breeding and genetics; nutrition; physiology and functional biology of systems; behaviour, health and welfare; farming systems, environmental impact and climate change; product quality, human health and well-being.

CAMBRIDGE UNIVERSITY PRESS
Comparative Exercise Physiology

Comparative Exercise Physiology (CEP) provides a forum for presenting the results of research relating to understanding and improving animal exercise and performance. Research into all animals, including humans, will be welcome. The key areas the journal will concentrate on include: exercise physiology, biomechanics and gait (including the effect of riders), nutrition and biochemistry, rehabilitation, psychology and behavioural aspects of a Ph.D. thesis). These might include technical notes. 1) Full research papers. A full account of a complete project with experimental details. 2) Short communications. A preliminary account of exciting new results for which work is ongoing. Indicative experimental summaries should be included. 3) Research notes. Short accounts of small projects that might not merit a full paper (e.g. undergraduate research projects or minor aspects of a Ph.D. thesis). These might include technical notes. 4) Reviews. Literature overviews of research in a larger subtopic or comparative reviews of related work in different species.

In addition to these four types we also welcome Letters to the Editor with comments on recently published papers to encourage a dialogue between readers and researchers. Please indicate the type of paper you are submitting.

Technical and Nomenclature Standards
All work should use SI units as standard. Anatomical terms can be identified for correspondence), and abstract. 2) The text, divided into appropriate headings. 3) Acknowledgements (if any). 4) References. 5) Tables (each on a separate sheet). 6) Captions to illustrations (group on a separate sheet or sheets). 7) Illustrations, each on a separate sheet or as separate files.

Tables should be in a simple form. They should not be used if text or legends give the same information. Each table must be accompanied by a clear and concise caption.

Illustrations
Please ensure that figures appear clear, large enough to be read. Please ensure that all line drawings are not too light, black and white only, and suitable for reproduction. Please ensure that all line drawings are not too light, black and white only, and suitable for reproduction. Please ensure that all line drawings are not too light, black and white only, and suitable for reproduction.

Types of Paper
CEP publish four types of paper:
1) Full research papers. A full account of a complete project with experimental details.
2) Short communications. A preliminary account of exciting new results for which work is ongoing. Indicative experimental summaries should be included.
3) Research notes. Short accounts of small projects that might not merit a full paper (e.g. undergraduate research projects or minor aspects of a Ph.D. thesis). These might include technical notes.
4) Reviews. Literature overviews of research in a larger subtopic or comparative reviews of related work in different species.

Arrangement of Papers
Please arrange your paper in the following order:
1) Title page. Article title, authors addresses (one author should be identified for correspondence), and abstract. 2) The text, divided into appropriate headings. 3) Acknowledgements (if any). 4) References. 5) Tables (each on a separate sheet). 6) Captions to illustrations (group on a separate sheet or sheets). 7) Illustrations, each on a separate sheet or as separate files.

Publications
The corresponding author will be sent a PDF file of the final paper for use. There will also be an option to purchase illustrations. You should use the following conventions when providing the full citations in the reference list.

Definitions of paper:

Ethics
The authors must demonstrate that the experimental procedures employed conformed to the accepted principles of animal welfare in experimental science. Please see the CEP website for more details journals.cambridge.org/cep.

Copyright
Papers are accepted papers on the understanding that the work has been submitted exclusively to the journal and has not been previously published, and will be published with a transfer of copyright form with their proofs, this must be completed and returned to the Publisher.

Note that it is the author’s responsibility to ensure that permission has been obtained from the copyright owner if you wish to reuse any figures or illustrations from previously published work.

Proofs
We will contact, and send page proofs for correction, to the first named author unless you indicate otherwise.

Offprints
The corresponding author will be sent a PDF file of the final published article for use. There will also be an option to purchase offprints.

For a more detailed Notes for Authors please visit journals.cambridge.org/cep

RESEARCH PAPERS

A comparative study of interval and continuous incremental training in Thoroughbreds
LL Bronsart, RH Sides and WM Bayly
49–57

Endocrine changes after experimental showjumping
A Forlizzo, P Medica, C Cravana and E Fazio
59–66

Thoroughbred yearling sales price and subsequent season end 3-year-old racetrack performance measured by Timeform ratings
AL Andersen and TC Whitaker
67–71

The effects of a post-workout nutraceutical drink on body composition, performance and hormonal and biochemical responses in Division I college football players
SM Arent, P Davitt, DL Golem, CA Williams, KH McKeever and C Jaouhari
73–80

Effect of omeprazole and ranitidine on total carbon dioxide concentration in horses subjected to a simulated race test
D Ciolino, RA Lehnhard and KH McKeever
81–87

Dressage training affects temporal variables in transitions between trot and halt
E Tans, S Nauwelaerts and HM Clayton
89–97
