The European Mosquito Control Association (EMCA) and Wageningen Academic Publishers are collaborating to publish the 'Journal of the European Mosquito Control Association'

Wageningen Academic Publishers and EMCA are pleased to announce their collaboration for the 'Journal of the European Mosquito Control Association' (JEMCA). Together we hope to further grow and continue delivery of high-quality content.

Francis Schaffner, president of EMCA and editor-in-chief of JEMCA comments on this news: "The newly established cooperation with Wageningen Academic Publishers is a very exciting development for the JEMCA, and will be most beneficial to the growing success of this international, online journal. The JEMCA was established in 1998 in response to the need for a forum for information on vector and pest arthropods of public and animal health importance, for Europe or for any other region. We intend to facilitate to address, in particular, aspects of control methods and tools, identification and taxonomy, and reports on surveillance and monitoring. For the first time JEMCA will also accommodate a range of other vector species. Many thanks to all who have agreed to be on our new editorial board – which is made up of internationally renowned scientists from across vector groups and disciplines – who will be of great help to me. As president of the EMCA and as editor-in-chief I would like to thank all who have been involved in this transfer, especially the energetic and enthusiastic team at Wageningen Academic Publishers, and for having the opportunity to increase visibility of the journal to both readers and authors."

Renate Smallegange, commissioning and managing editor at Wageningen Academic Publishers says: "We are thrilled to cooperate with EMCA. Their journal is a great match with other titles that we have published for years. It is our aim to use our experience in entomological topics and our personal approach to help the journal grow. We look forward to expanding the journal's reach and readership."

About 'Journal of the European Mosquito Control Association'

The 'Journal of the European Mosquito Control Association' (JEMCA) is a gold open access, peer-reviewed, online journal, overseen by the European Mosquito Control Association. For more information, please visit the website: www.wageningenacademic.com/jemca.

Publishing in JEMCA

Articles to be considered for publication may address mosquitoes and other vectors and pest species for Europe and its associate territories, but also for any other region. They may deal with, but are not restricted to, aspects of control methods and tools, identification and taxonomy, distribution, ecology and field studies, reports on surveillance and monitoring, as well as applied research on biology and pathogen transmission. The publication fee can be found on the [website](#), and interested authors should refer to the [submission guidelines](#). All papers are subject to peer review from an established pool of specialist scientists.

About the European Mosquito Control Association

The [European Mosquito Control Association \(EMCA\)](#) gathers professionals and experts from Europe and beyond with the aim of strengthening cooperation in the technical and operational aspects of mosquito control. EMCA is a non-profit association registered in Strasbourg, France. It was founded in March 2000 in Waldsee, Germany and has members from Europe, the Middle East, Africa and USA. The overall objective of EMCA is to promote the sustainable, effective and efficient control of mosquitoes and other pest and vector arthropods, and to disseminate affiliated information to its members and others in Europe and neighbouring regions.

About Wageningen Academic Publishers

Wageningen Academic Publishers is an independent STM publisher in the field of Life Sciences. Located at the heart of one of the world's most famous food & agriculture research centres, they focus on topics in animal & veterinary sciences, food & health sciences, agribusiness & rural studies and agriculture & environment. They publish both scientific journals and books (monographs, textbooks and proceedings). For more information, please refer to the website: www.wageningenacademic.com.
